OUR MISSION

To proactively partner with our Library users by delivering innovative services and targeted published content in support of quality patient care, research excellence, and ongoing learning for the progressive control and cure of cancer.

CONTENT FOCUS

Access the latest comprehensive oncology resources and tools to clinical, research, health care, and administrative information. Electronic resources form an integral part of the Library’s collection with a full range of databases, ejournals and ebooks. Our print collection contains key reference works and the most current publications by our clinicians, researchers, and healthcare professionals.

JOIN THE LIBRARY – <https://library.mskcc.org/about/joining-the-library>

All Memorial Sloan Kettering students and employees, and staff from our neighboring institutions must have valid identification to access and borrow print materials from the Library. Drop by the Library to register. Access privileges extend to the Libraries of the Hospital for Special Surgery, Rockefeller University, and Weill Cornell Medical College.

COLLECTIONS & CONTENT

LibGuides – <http://libguides.mskcc.org/>

View our LibGuides or request a customized guide for your team or department. LibGuides are collections of web pages providing research assistance, subject overviews, current awareness, and useful resources compiled and organized by the Library staff.

Library Website

Connect to a wealth of published information and resources supporting the research and medical activities of the Center. Use the Website’s search discovery tool (OneSearch) to uncover these resources and more.

Recommendations for the collections are always appreciated and can be sent via the online form,

New Title Recommendation: <https://library.mskcc.org/help/new-title-recommendation-form>

OneSearch

MSK Library OneSearch provides a simple interface to find books/eBooks, and articles. There are five ways (scopes) to search for content based on what you need. Each scope allows you to search for either (1) articles, books, and more (all resources owned, subscribed or open access); (2) books and more (no databases or articles); (3) articles (no books/eBooks); (4) Tri-Cat (electronic & print collections of MSK and print collections from Cornell and Rockefeller libraries); and (5) Rockefeller and Weill Cornell eBooks and eJournals (does not include MSK collections; identifies resources from only these two locations).

Synapse – <https://synapse.mskcc.org/>

This resource connects you to publications authored by Memorial Sloan-Kettering staff. Use Synapse to update your publication bibliography, see author collaborations, complete a core grant application, or find the subject expertise of an MSK researcher or clinician. Contact the Synapse Administrator if you don’t see your profile or you have a missing publication.

Today's Science Sparks

View daily images from MSK-authored scientific and medical publications on the Website and link to additional information. Images are also displayed on a plasma screen.

SERVICES

Consultation & Reference Services

Research Informationists specialize in complex search requests. They provide research assistance and conduct literature searches, identify quality reference resources, online databases, and Internet sites. Subject-specific research alerts can be requested.

Embedded Librarian Program

Contact Reference to explore the potential of assigning a research informationist to your clinical team. The embedded librarian contributes as a team member providing customized library services and activities and proactively supports the team's information needs. They also facilitate problem solving and decision making.

Document Delivery Service (ILLiad) – <https://illiad.mskcc.org/illiad/>

This service is available to all Memorial Sloan Kettering employees and students in support of their clinical, research, or administrative needs. Online registration is required for first-time users.

Fulltext@MSK

This button is featured in many databases such as BIOSIS, CINAHL, PsycINFO, PubMed, and SCOPUS. Click to view a menu with available options for each citation in the search results. Options include direct access to the full text article or to the Library's Document Delivery Service to immediately submit a request to obtain the article.

Library Services for Patients & Caregivers – <https://library.mskcc.org/resource/patient-and-caregivers>

Patients, family members, and their caregivers are welcome to visit the Library when on campus. Staff are available for consultation and customized research in person as well as via the phone or Web. To learn more about specific services we offer, please ask us.

ORCID@MSK – <https://synapse.mskcc.org/orcid>

Supports authors and their scholarly activities by eliminating author name ambiguity and improving discover ability to their research and scholarly works.

Remote Access (Off Campus)

To access all resources, with the exception of UpToDate, all you need is your current MSK user name (same name you use to login to your computer when you're on site) and employee ID number. The Remote Access link is located in the top right corner of the Library Website.

Systematic Review Service – <http://libguides.mskcc.org/SR>

Submit a request for support for your next systematic review. As a member of your publication team, the Research Informationist provides a variety of services to ensure the systematic review is executed correctly.

Training & Orientation – <https://library.mskcc.org/services/training>

The Learning Lab has been designed to enhance work productivity by organizing our training offerings into four key themes: Citation Management, Database Searching, Evidence Based Practice, and Publishing & Author Support. Each theme provides formal and informal ways to learn. We can customize Library sessions, clinics or workshops for small groups or provide individual consultations, Library tours and orientations.

AMENITIES

Mobile Device Lending & Charging – <https://library.mskcc.org/services/mobile-device-lending-charging>

All MSK employees, students, and staff from our neighboring institutions with valid identification can borrow a laptop or iPad. All laptops contain Microsoft Office programs such as Word, Excel, and PowerPoint, as well as EndNote. At the Library in the Rockefeller Research Labs building, we also have charging stations, where MSK staff and affiliates can charge smart phones, laptops or iPads.

Printers & Copiers – <https://library.mskcc.org/services/printers-copiers>

Library workstations are networked to both black & white and color printers. ALL print jobs must be released at the Copy Print Area station by the user before they will print. There are charges depending on print job and users are welcome to visit the information kiosk to purchase a refillable payment card for use with these machines.
